ASSEMBLY INSTRUCTIONS

STEP 1:

Confirm product contents by emptying contents of bag(s) and confirming all parts are included and undamaged.

STEP 2:

Select a smooth level site and spread out your tent.

STEP 3:

Extend poles and place in position ready for installation. Take a tent pole and push it through a pole sleeve located at the top of tent. Repeat process with the remaining tent pole. Poles will cross each other at the center.

STEP 4:

After sliding poles through sleeves, gently flex poles into an arch and insert ends into pole pockets at base of tent.

NOTE: Make sure pole sleeve fabric is evenly distributed along pole and does not catch at pole joints. Undue stress could break pole or tear fabric.

STEP 5:

Insert 3rd shorter pole on top of tent to extend front and back panels.
